

CANDLE AND A METHOD  
FOR PRODUCING A CANDLE

ABSTRACT OF THE DISCLOSURE

The invention relates to a candle with a container, which contains a transparent gel wax and at least one wick and the melting point of which is higher than that of the gel wax. The material of the container is a transparent polypropylene or a transparent polyethylene or transparent plastic, each material having a melting point that is only slightly higher than the gel wax. The material of the container can contain colored pigments.
